

Crystal Lift-it Lock is so adaptable

Get all your desk equipment at the right height

Relieve tired eyes and get dual screens to the same height

Your laptop screen should be as near as possible at the same height as your main screen

Free Standing Crystal Lift-it Lock is a Monitor, Printer, Laptop Stand height adjuster and its unique slide lock stacking idea DOESN'T need technician assistance.

Position your screens and other desk equipment yourself to suit you.

Crystal Lift-it Lock stacks on itself to a height (see below) to suit you. Attractive lightweight and versatile Crystal Lift-it Lock is as good in a single or dual screen or more horizontal mounting positions. The unique slide lock lets you lift it without coming apart.

Crystal Lift-it Lock provides the ideal product to align your monitor stand/s and laptop to the correct height without the need of a technician, as it is free standing. It is equally perfect when dual or more horizontal units are in use and with the individual stacking method lets you achieve the correct eye line for different sized screens such as laptop and desk based when being used at the same time. Crystal Lift-it Lock is clear acrylic and enhances the look of your desk but is sturdy with 4.5mm walls and a small footprint which takes up less desk space.

Crystal Lift-it Lock is 200mm deep and 305mm wide and 55mm high. When stacked on top of each other the height increases in 50mm increments as it takes 5mm to provide the ingenious stacking method. This provides heights of 55mm, 105mm, 155mm, 225mm, etc. End height is your choice based on the recommended eye line. We suggest no more than 4 high.

In a dual or more situation each stack can be a different height to suit different sized devices

IT GETS EVEN BETTER

Crystal Lift-it Lock provides space for storage of paper, books or other quickly accessed items. We recommend a maximum weight no more than 8Kg. The price is right and comes single or in a box of 2 units at a better price. Stacks in multiples of 50mm. Great for Laptops to get to screen height and help with line of sights.
