Glass Writing Boards

Glass Writing Boards

For the ultimate chic look we recommend glass writing boards. A modern alternative to a conventional whiteboard - very minimalist and unobtrusive.

Glass writing boards are made of toughened glass and come with chrome button fixings for a stylish, contemporary look. Extra components also available to set glass slightly off the wall.

These can be made in whatever size suits *your* requirements and can be super-clear (no green tinge) or with frosted or coloured backing, to match any décor. Great for offices, boardrooms, reception areas or anywhere where you need a dash of style.

They work with standard whiteboard markers and clean easily. A perfect complement to the modern interior. Clear and frosted finishes blend in well with your walls; white, black & colours can make for sharper drawing and are magnetic.
