

Specifications

Multi-channel TM technology allows you to instantly switch between your favorite three Bluetooth enabled devices while continuing to type on the FS2 Blue keyboard. **Sleek, low profile design** has a zero degree slope which minimizes the height, effectively creating negative slope and reducing wrist extension. **Accommodates a wide range of individuals** the Freestyle2 allows for maximum flexibility catering to each individual's unique needs. Out of the box both modules are connected together by a flexible

pivot tether allowing an infinite range of splay. Disconnecting the pivot tether allows up to 9 inches of complete separation of both left and right keying modules. **More Optional palm supports. Left side driverless hot keys & Bluetooth Multi-channel keys** for commonly used mouse actions. (Internet Page Forward and Back, Beginning of Line, End of Line, Cut, Undo, Copy, Select All and Paste). A vertical rib is located on the inside row of hot keys to provide tactile notification to the user. **Top row driverless hot keys** like the new iMac keyboards plus more! Esc/force quit, Brightness, Exposé, Dashboard, Play Audio, Audio Volume, Dock, Eject & Off/Sleep. **Low-force, tactile keyswitches** with typical average maximum key force of 45grams. **Reduce forearm tension with the optional VIP3 and V3accessories.**

Compatible operating systems; PC version compatible with Windows, Linux and Android Bluetooth enabled devices. Mac version compatible with OS X 10.4 and newer, and iOS devices
