

Specifications

Encourage healthy natural movement with the ambidextrous Mouse Trailer Palm Support, with elasticised leads which trail effortlessly behind your mouse movement.

1. Mouse Trailer is soft foam support with a palm pommel to prevent slide off.
2. Mouse trailer trails your mouse as you move it around while supporting your palm.
3. The elasticised leads adhere to each side at the rear of the mouse to allow trailing which in turn creates self adjusting support for any size hand in

the neutral position.

4. The Lycra soft polyurethane foam has a soft breathable jersey fabric cover.

5. Included free of charge with every mouse trailer is an optical/laser friendly mouse pad.
