

Specifications

Penlic is the sophisticated ergonomic mouse for the sophisticated user. Penlic takes the computer mouse to the next level. It enables the extension of our bodily movements and harnesses the natural power and dexterity in our fingers and hands. This creates a healthy and natural working position. Endless clicking and unnecessary cursor movements are a thing of the past. The innovative computer mouse, Penlic Mouse looks, feels and moves like a pen. This means it can be utilised by all people in demanding professions, or by everyday users at home. Its smooth pen grip provides comfort and a relaxed working position for your

wellbeing. The mouse is available in 3 versions, wired, wireless and Bluetooth.

The smooth pen-grip and small movement provides a cursor experience like no other. **Penlic Mouse will allow users to be more exact and precise which leads to better results in less time.** Penlic Mouse creates a relaxed and natural working position which allows your forearm to rest on the work surface reducing pain. **The Penlic Mouse is so effective it allows the user to work in front of and beside the computer.** This combined with the comfortable pen grip reduces the risk of RSI.
