

Specifications

The Penguin mouse is a breakthrough in the use of stick vertical mice. It uses the fingers rather than the thumb on the click buttons. It is a stick mouse for left and right use and is ideal for switching hands throughout your day. The central "bow tie" switch allows easy transition from one hand to the other.

Ergonomic slanted operating position is achieved with vertical use. Your hand can rest comfortably alongside the vertical grip with 2 sizes (above 175mm from tip of middle finger to top of wrist use standard and below 175mm use small). Precision laser with 400,600,800,1200 dpi settings. In wired and wireless.
