

## Specifications

The roller bar which is not AS DEEP AS A STANDARD KEYBOARD REST AND can sit EASILY in front of your keyboard.

RiteBar is an ergonomic roll-bar mouse that sits in front of your keyboard, eliminating the need to reach sideways for the mouse, minimising stress to your neck, shoulders and elbows. There's no need to reach to the side, everything you need to control your computer is right in front of you.

The RiteBar button functions include the practical '**one touch**' **double click** and **copy/paste**, as well as a **scroll wheel & left & right click**. You can use the rollerbar to click & slide back and forth to move your cursor around the screen. You can also switch between high or extra high precision at the touch of a button (750 dpi/ 1000 dpi/ 1200 dpi). (see underside)
