

PLUS Wireless Interactive Panel

UPIC

ULTRA PORTABLE INTERACTIVE COMMUNICATION

*An entirely new
flexible interactive
whiteboard that fits
into your world*

INSTALLATION

UPIC boards can be set up in seconds with little or no installation costs.

PORTABILITY

UPIC boards can be hung on any magnetic surface (e.g. your existing whiteboard), making them simple to transport and easy to move from room to room if required.

CURRENT WHITEBOARD OR BLACKBOARD REMOVAL

Other manufacturers may require you to remove or possibly ruin your existing boards by using unsightly and costly brackets. UPIC allows you to keep your options open while maintaining your black and white surfaces.

POWER

UPIC boards do not require any cables or power, and a cordless pen transmits information to a PC via Bluetooth®.

INTERACTIVITY

You interact with UPIC the same way you do with any interactive whiteboard. You write with the pen and you click with the mouse. Your PC-based software experience will remain unchanged.

PROJECTION SCREEN

Unlike other interactive whiteboards, the unique surface of UPIC boards minimises the reflection and glare of a projector, making viewing projected images more comfortable.

UPIC WILL CONVERT YOUR EXISTING BLACKBOARD OR WHITEBOARD INTO AN INTERACTIVE BOARD IN SECONDS

Being portable and wireless, the panel rolls up and can be quickly packed away in its carrying case, along with its few accompanying items.

PLUS

With the provided markers and eraser, you can write and erase just like using a regular whiteboard.

PLUS Wireless Interactive Panel

UPIC

3-IN-1 FLEXIBILITY

- Interactive whiteboard
- Regular whiteboard
- Projection screen

Have dynamic interactive presentations whenever and wherever you like, using the extremely portable and wireless UPIC.

- Regular whiteboard
- Projection screen

THE INTERACTIVE SURFACE

To create this interactive surface, a patent-protected dot pattern from Anoto AB has been added to the UPIC writing surface.

The pattern, virtually invisible to the naked eye, consists of numerous intelligent small black dots that can be read by the unique digital pen.

The pattern indicates the exact positions of the digital pen and the pen sends this information to your PC via Bluetooth®.

When you write over the projected image, the unique pen takes digital snapshots (*more than 50 pictures per second*) of the pattern. Every snapshot contains enough data to determine the exact position of the pen.

The data is transferred via Bluetooth® in real time to your computer, which in turn projects the writing and gives you mouse control.

QUICK AND EASY SETUP

- ★ Simply unroll the UPIC and attach it to a whiteboard, chalkboard or similar magnetic surface.
- ★ Project an image using your existing data projector.
- ★ Calibration is as quick as touching four targets with the digital pen.
- ★ The UPIC programme menu is intuitive and requires little training.

MODEL NAME		UPIC-56M	UPIC-64M	UPIC-W72M
Type of installation		Magnetic sheet type	Magnetic sheet type	Magnetic sheet type
External dimensions (mm)		w1160 x d11.3 x h865	w1330 x d11.3 x h995	w1630 x d11.3 x h1070
Weight		Approx 1.6kg	Approx 2.1kg	Approx 2.8kg
Panel	Size (mm)	w1130 x h845	w1300 x h975	w1600 x h1050
	Projection area size	56 Inches (4:3) max	64 Inches (4:3) max	72 Inches (16:9) max
	Reading system	Anoto dot pattern using Anoto digital pen		
Digital pen	Model name	ADP-301		
	Power supply	1 x AAA alkali battery (1.5V)		
	Interface	Conforming to Bluetooth® 2.0 class		
	Main unit weight	Approx 40g (including battery)		
	Operating time	During continuous drawing - approx 5 hrs In standby - approx 150 hrs (with cap removed)		
Usage conditions	Temperature	0°C - 40°C		
	Humidity	30 - 85%		
Interactive mode	White screen mode	Yes		
	Overlay screen mode	Yes		
	Mouse mode	Yes		
	Functions	Pen colour (8 colours) / Highlighter colour (8 colours)		
		Eraser / Pen & eraser size selection / Insertion of pictures / Deleting of page contents / Screen mode selection / Printing / File input & output		
Whiteboard	Marker writing	Yes		
Accessories		Digital pen, spare stylus for digital pen, AAA alkali battery (1.5V), markers (black & red), eraser, carrying case, user manual & manual for digital pen (printed), CD-ROM (UPIC Utility, UPIC Touch & Draw, PDF user manual (detailed))		
Computer requirements	Compatible operating systems	XP (home edition/professional edition service pack 3 or later) Vista 32bit versions		
	Compatible computer types	Pre-installed models operating on one of the operating systems above		
	CPU	Pentium 4 processor or later		
	Memory	512Mb or greater		
	Hard disk	200Mb or greater		
	Display resolution	1024px x 768px or greater, high colour or greater		
	Devices	Bluetooth® adapter, standard computer USB port, CD-ROM drive		
	Compatible Bluetooth® stacks	Microsoft® Bluetooth® stack Broadcom's Widcomm® Bluetooth® software stack Toshiba Bluetooth® stack BlueSoleil Bluetooth® stack
